-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 2 is indefinite because the term "uptaking" is unclear without a definition of "up". The orientation of the molten glass pump relative to an "up" direction was not established in the claim. The term "intaking" may be clearer.

4. Claim 4 is indefinite because line 5 seems to be discontinuous. The claim might read more clearly if the words "said flights" were added before "include".

5. Claim 11 is indefinite because line 2 seems to be discontinuous. The claim might read more clearly if the word "allowing" were substituted for the word "that".

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bailey (US 2072807).

8. Bailey taught methods of homogenizing and controlling the flow of molten glass from a forehearth incorporating a tubular member with spiral wings or vanes (see figures and page 2, col. 1, line 38 to page 3, col. 2, line 5). Glass was recirculated through the center of the rotating tubular member before exiting the forehearth housing through an orifice. Bailey did not teach a glass forming apparatus. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to place a glass forming apparatus at the orifice exit of Bailey's forehearth because that is the known purpose of a forehearth, to supply molten glass to glass forming means.

Allowable Subject Matter

9. Claims 12-51 are allowed.
10. Claims 2-11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
11. The following is a statement of reasons for the indication of allowable subject matter:
The prior art does not teach or fairly suggest means for or method steps of recirculating molten glass from the output end of the molten glass pump toward the input end thereof through a centerline recirculation channel.

Conclusion

12. The prior art made of record and not relied upon is cited to further show the state of the art.
